SUMMARY

B.Tech student specializing in Artificial Intelligence and Machine Learning with a strong foundation in data structures, algorithms, software engineering, and full-stack web development. Proficient in C, C++, Python, JavaScript, and the MERN stack, with hands-on experience building scalable web applications. Currently expanding expertise in Machine Learning, TensorFlow, and Computer Vision through practical projects and continuous learning. Passionate about solving real-world problems and developing innovative, impactful technology solutions.

SKILLS

Programming: C, C++, Python, JavaScript

Web & Database: HTML, CSS, SQL, MySQL, MongoDB

Frameworks: TensorFlow, OpenCV, NumPy

Core Concepts: DSA, OOP, DBMS, OS

Tools: Git, GitHub, VS Code

Soft Skills: Communication, Teamwork, Problem Solving

PROJECTS

Unimeet – Faculty Appointment Management System

- Developed a web-based faculty appointment management system for students and faculty.
- Enabled faculty to create slots and students to book appointments based on availability.
- Implemented scheduling, appointment history, and notifications.

Deepfake Image Detection Software

- Built an AI-based system to detect manipulated/deepfake images using deep learning.
- Used TensorFlow for model training and OpenCV for preprocessing.
- Improved classification accuracy using optimized datasets.

PrajaVaradhi

- Developed a civic engagement platform connecting citizens with representatives.
- Implemented complaint submission, issue tracking, and communication modules.
- Improved accessibility for public grievance redressal.

Hospital Management System | *MySQL*

- Designed a database system for patients, doctors, appointments, and records.
- Created SQL queries for insertion, retrieval, updating, and reports.
- Applied normalization up to 3NF and schema design principles.

EDUCATION

SRM University AP

2024 – 2028

B.Tech in Computer Science & Engineering | CGPA: 9.11

CERTIFICATIONS

MongoDB Certified Associate Developer

Apr 2026

Click to View Certificate

- Certified in MongoDB concepts, indexing, queries, and development practices.

Introduction to Computer Vision and Image Processing

Apr 2026

Click to View Certificate

- Completed coursework covering image processing, feature extraction, object detection, and computer vision fundamentals.

Fortex Hackathon Participation

Feb 2026

- Participated in a hackathon focused on innovation and software solutions.

ACHIEVEMENTS

Build Unstop 2K26 Hackathon – 2nd Place

Apr 2026

- Secured 2nd place among competing teams with an innovative project solution.
- Demonstrated teamwork, execution, and problem-solving under deadlines.
